

Sock Puppet

What you need:

- A long sock (colour dependent on character)
- Googly eyes
- Pom poms
- Cardboard
- Wool or felt strips or tinsel
- Scissors
- Glue

First, make the mouth by cutting under the seam on only one side.

Now, on the cardboard cut out an oval shape.

Fold the cardboard in half.

Put the cardboard through the hole of the sock keeping the edges align.

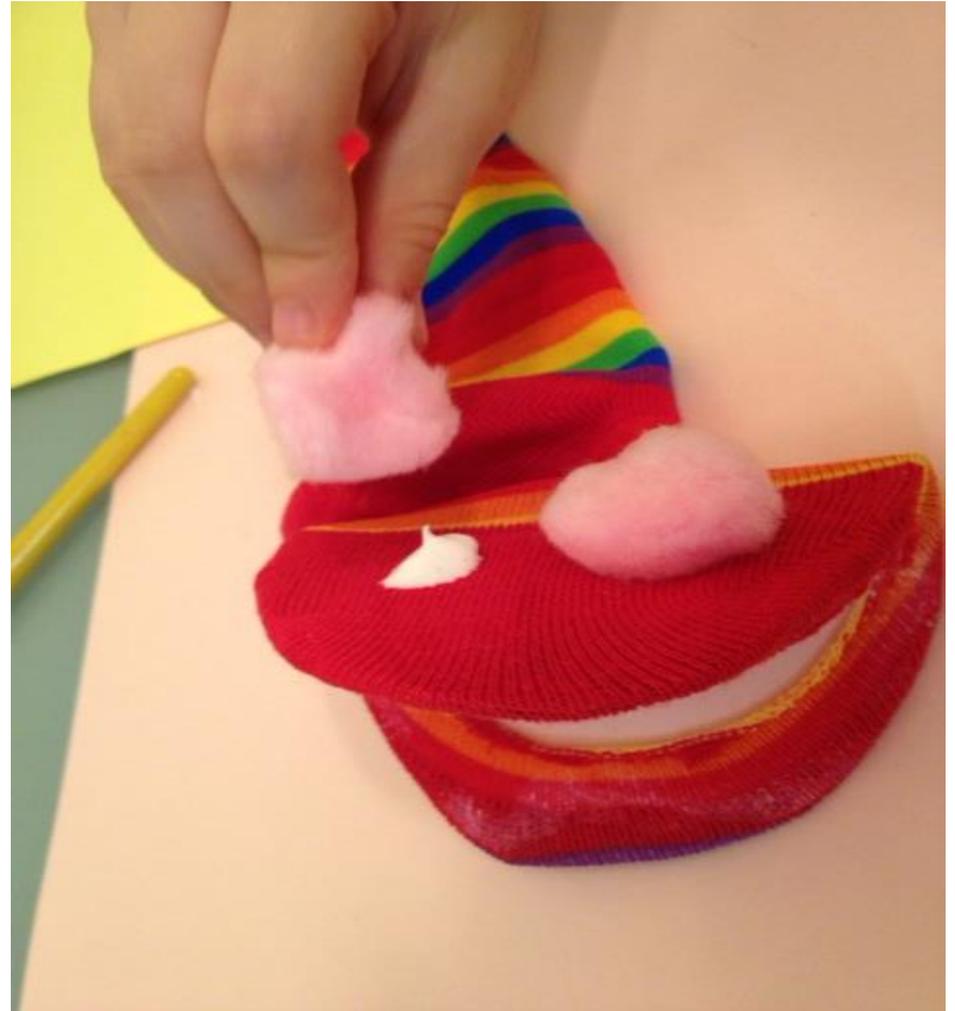

Spread glue around the edge of the cardboard.

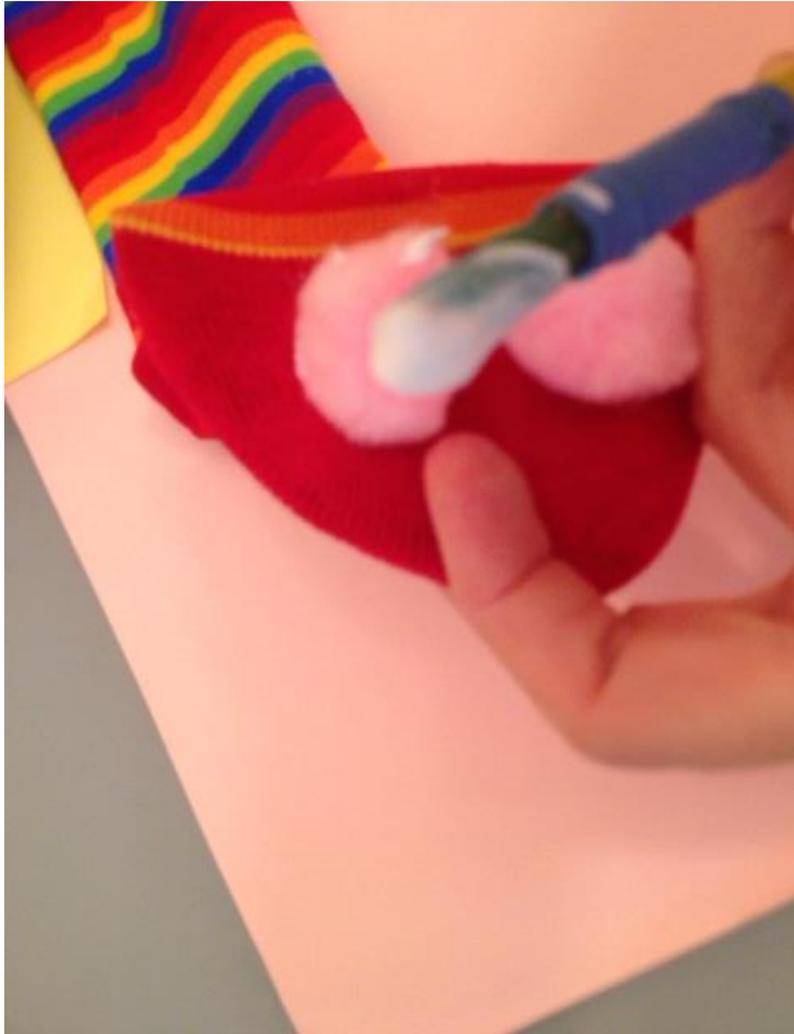

Stretch the sock over the cardboard and press down into the area where the glue is to ensure the sock bonds to the cardboard. Let it dry.

Then, to make the eye glue the pom poms on top of the mouth.

And glue googly eyes onto the pom poms.

Spread glue onto the area above the eyes of the puppet and press hair material (wool, felt strips, tinsel) firmly down. Let dry.

Your sock puppet is ready. Enjoy!
