

How to make a Felt Puppet:

What you need:

- Felt squares
- Glue
- Scissors
- Marker pen

1. Cut out the template and place on top of the felt.

2. With a marker, trace around the template onto the felt twice.

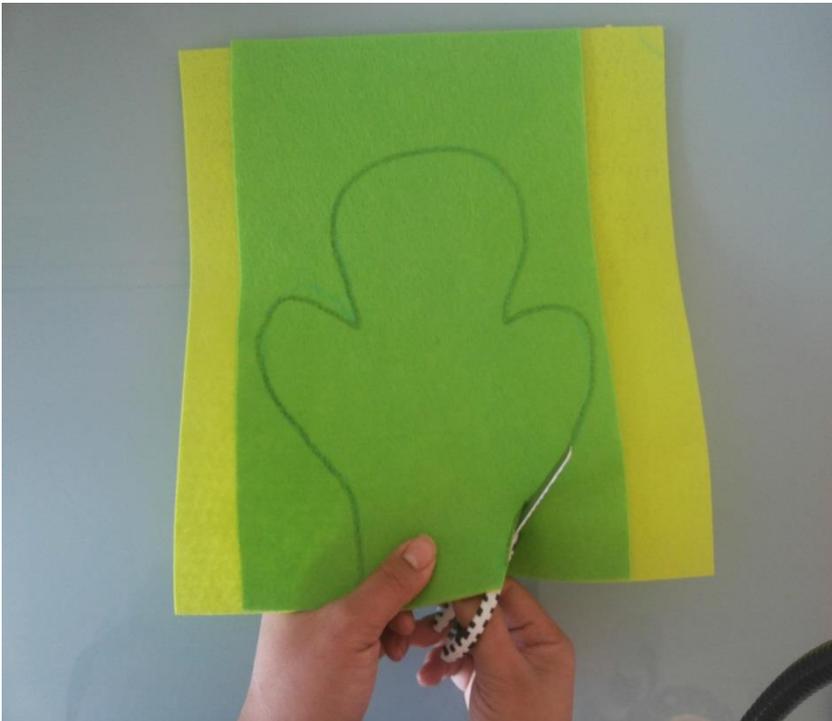

* If you don't have a template:

Put your hand onto the felt and trace around allowing ample space for a loose fit.

3. Cut out your tracing by either holding the two pieces of felt together or cut them out separately.

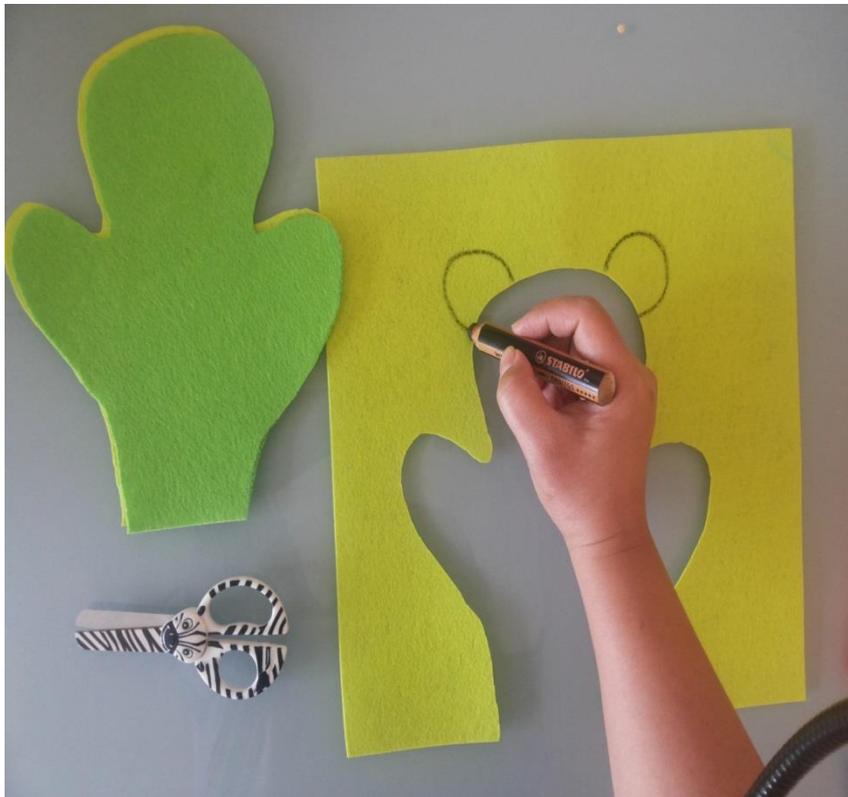

4. Apply glue around the edge, then align the two felts together as one.

** Remember not to glue the space to put your hands into. Once the glue has dried, flip inside out for a tidy look (optional).*

5. Draw features (eyes, ears, nose, mouth, tongue, clothing, accessories) onto the felt, then cut out and glue onto puppet.

6. Your puppet is ready to be used.
Enjoy!
