

How to make a Finger Puppet:

What you need:

- Felt squares
- Glue
- Scissors
- Marker pen

1. Place your finger on top of the felt and trace around allowing ample space (twice).

2. Cut out your tracing by either holding the two pieces of felt together or cut them out separately.

3. Apply glue around the edge, then align the two felts together as one.

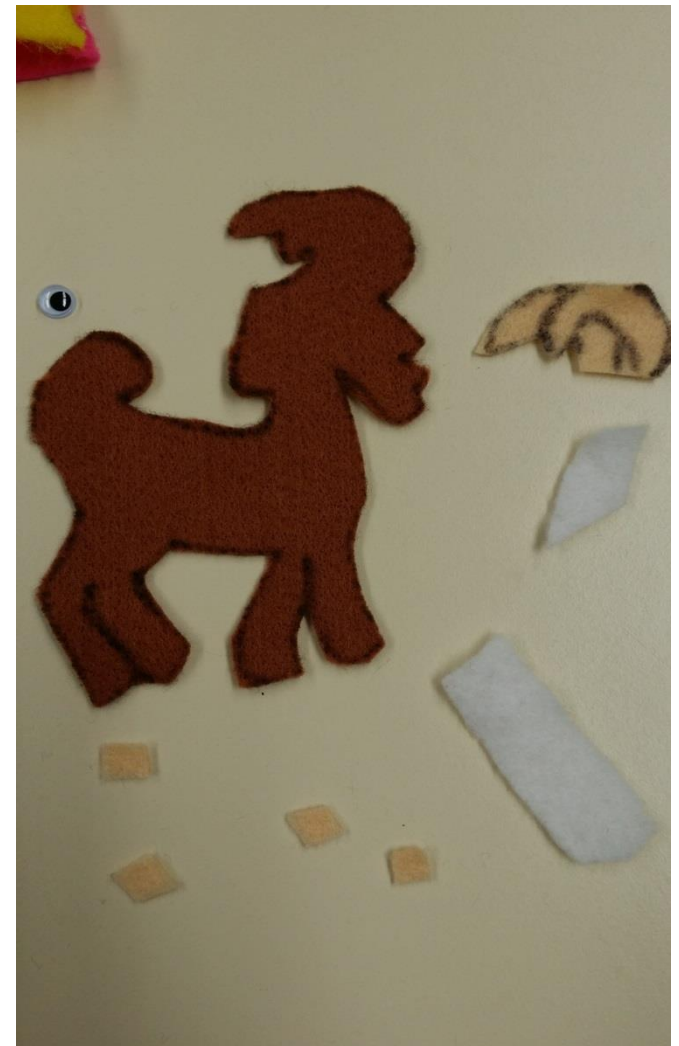

** Remember not to glue the space to put your finger into. Once the glue has dried, flip inside out for a tidy look (optional).*

Optional: Once the glue has dried, flip inside out for a tidy look.

4. Trace template shape and features onto felt and cut out.

5. Paste features onto your felt template.

6. Paste your felt template onto your finger puppet.

7. Your puppet is ready to be used.
Enjoy!
