

THE LEARNING CHRONICLES HUB

Session 1 – 18 & 19 November 2025

WELCOME MESSAGE

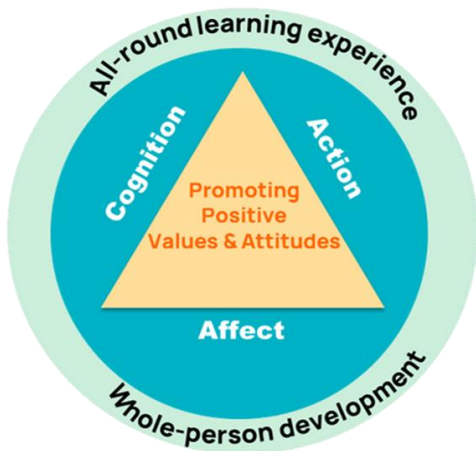

Welcome to the Values Education Learning Hub! As we embark on this exciting journey together, we invite you to explore the transformative potential of values education in our classrooms.

12 PRIORITY VALUES AND ATTITUDES

In our values education events, we emphasise experiencing values through hands-on activities to foster compassionate individuals for the world ahead.

THE CORE FRAMEWORK: CAA

Cognition: Fostering understanding of core values, enabling students to recognise and articulate why these values matter in their lives and communities.

Affect: Emphasising emotional connection through empathy and respect via discussions and reflective practices.

Action: Translating understanding and feelings into behaviour as students actively demonstrate commitment to values through community service, collaboration, and conflict resolution - integrating all three dimensions for whole-person development.

OUR HUB PHILOSOPHY

Empowering Educators, Transforming Classrooms.

Members are encouraged to connect, exchange, and share their professional experiences and good practices. By sharing insights and techniques, educators can enhance their teaching practices and authentically incorporate values into English language education.

This isn't just another professional development opportunity; it aims to empower teachers to help students thrive academically and as principled individuals ready to navigate challenges ahead.

This collaborative environment enriches their knowledge on effectively integrating values education into English language education, particularly through practical activities.
