Suggested Answers for Teachers

Scene 6: Q & A time

Please see the student worksheet for the layout of the questions for students.

1. Before watching

Students should think of their own questions. E.g. 'How do I get good at Object Theatre?' or 'How do I choose what movements the puppet should make?' Students questions may or may not be answered in the scene but there is the opportunity for students to answer their own questions as a group in the 'after watching' section. This process should stimulate a good discussion.

2. While watching

The questions that are answered in this scene are:

- *When we do Object Theatre, how do we avoid showing the puppeteer?*
- *How do I make my puppet's voice different to my own?*
- *How can you use objects to show the difference between characters, e.g. male and female, or young and old?*
- *Is Object Theatre only suitable for extra-curricular activities?*
